CESSNA 182, 206, 310, SKYMASTER AND PIPER COLT SR. COCKPIT INTERIOR

1. Trim the panel to shape shown.
2. Paint flat black.
3. Cut out the instruments from the enclosed instrument sheet, matching the numbers noted in the diagram. Use a piece of sharpened brass tubing (inside edge) to cut out the gauges. Glue instruments in position on panel.
4. Note color and placement of pins from diagram. Cut to length, push through panel and spot glue on back.

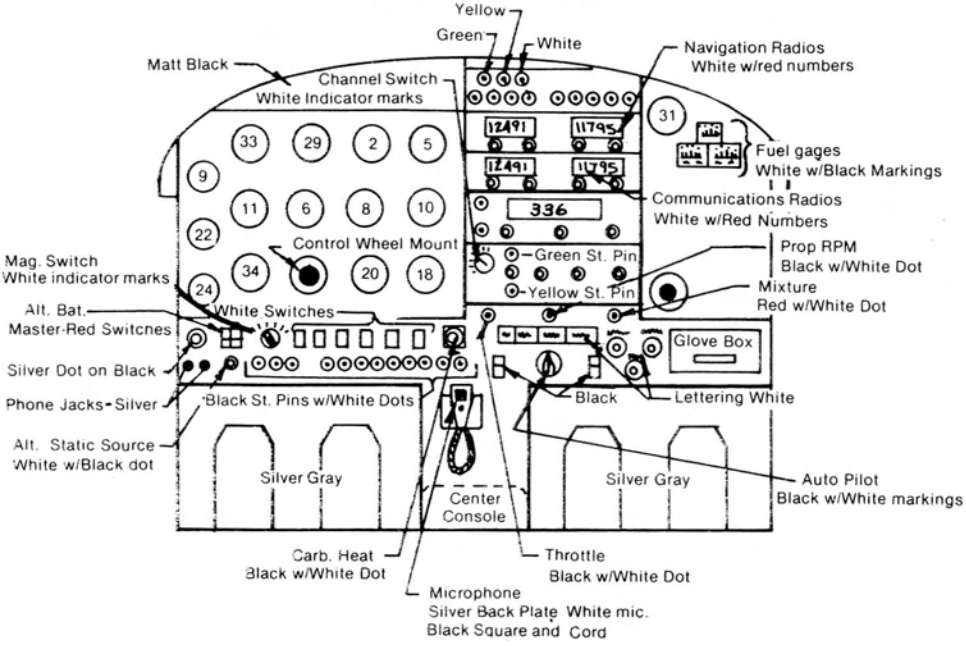

PINS

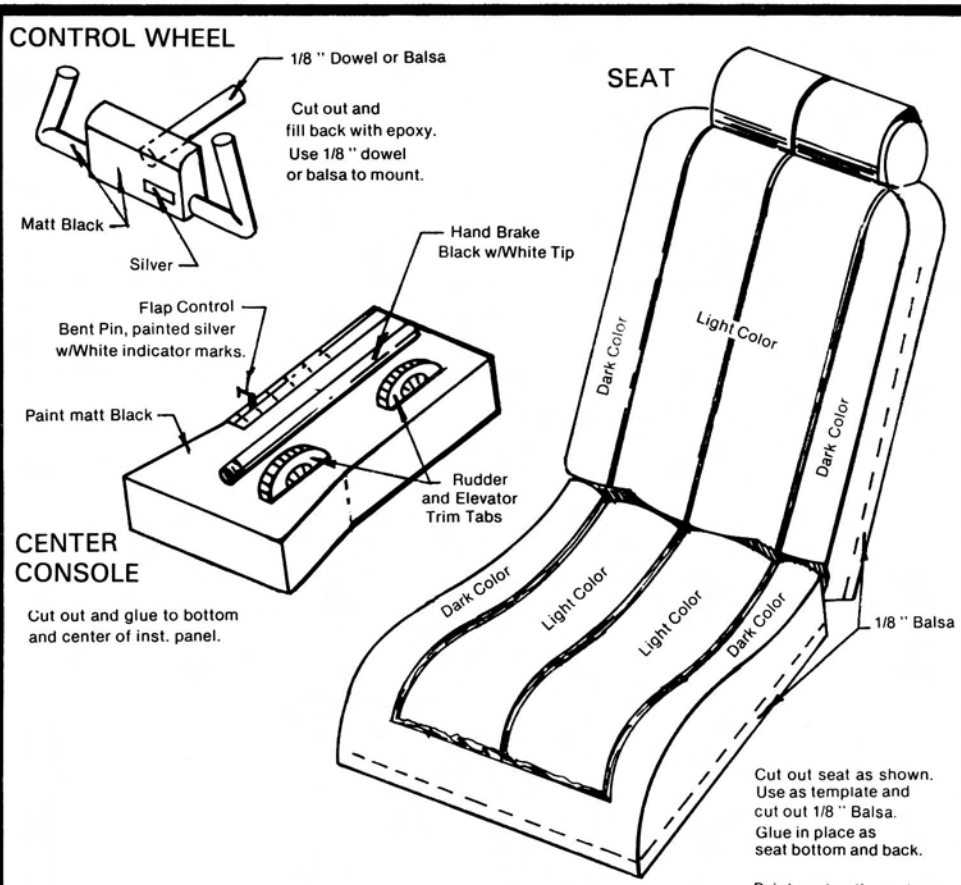

⊙ Silver St. Pin all black w/white dot unless otherwise stated.

◎ Small glass head all black w/white dot unless otherwise stated.

◎ Large glass head three only black w/white dot

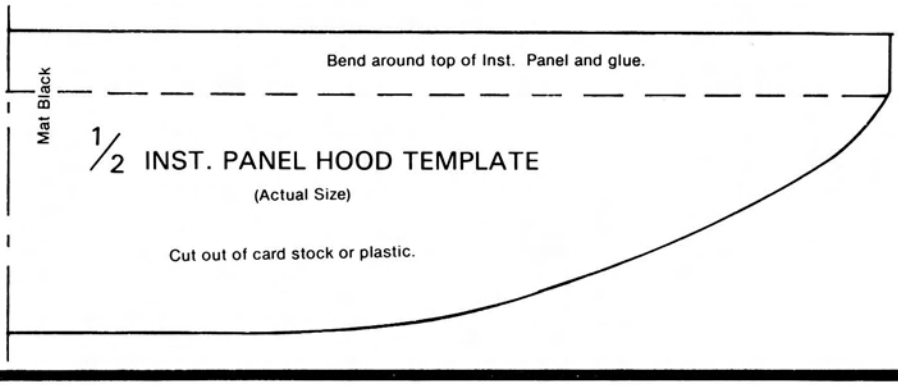

INSTRUMENT PANEL

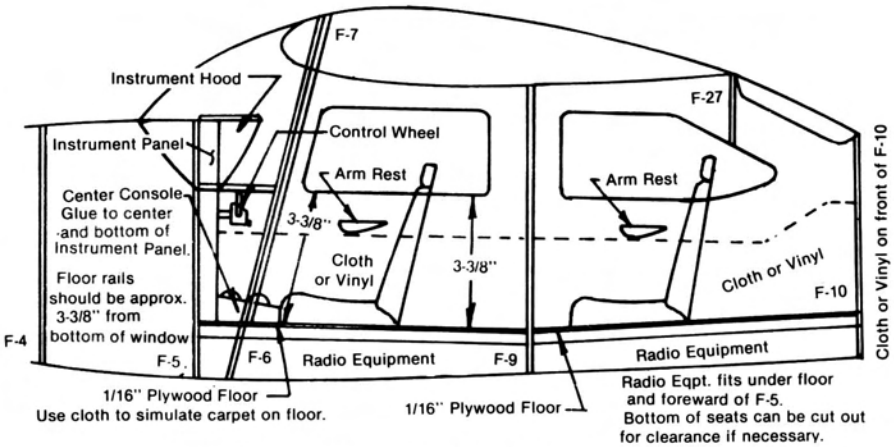

GENERAL ASSEMBLY

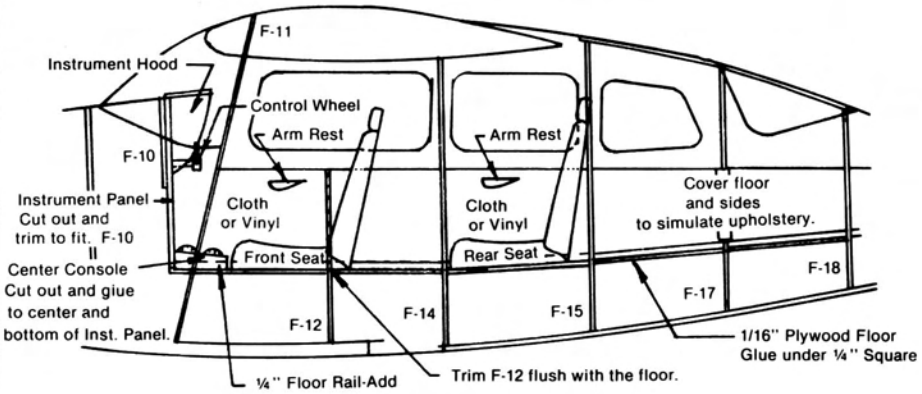

1. Assemble and paint both control sticks as shown. Glue these in position on instrument panel.
2. Cut out 1/8" balsa backing (not included) per diagram, glue in place and glue seat halfs together. Paint as shown.
3. Paint instrument hood flat black.
4. Cut out center console and paint as shown. Add pin and glue in position at base of instrument panel.

GENERAL INSTRUCTIONS FOR INSTALLATION IN ROYAL KITS

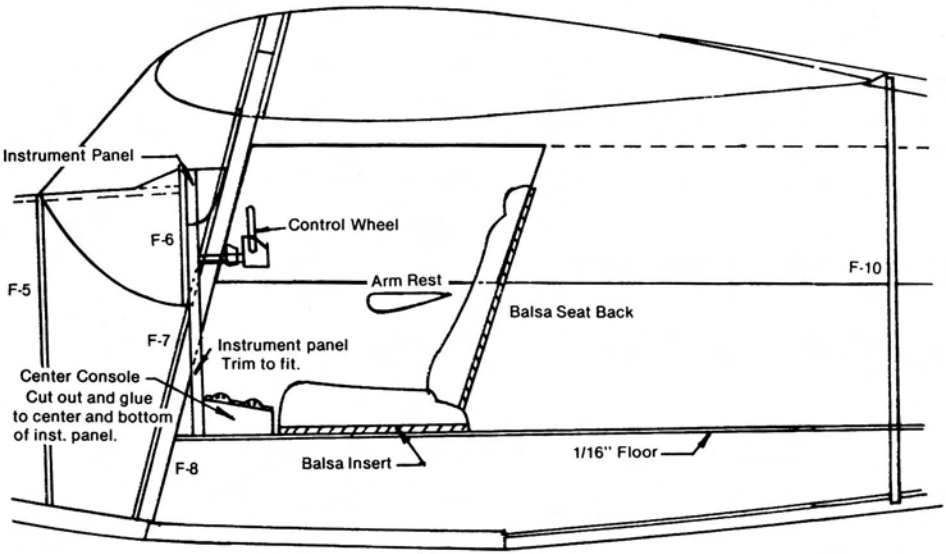

1. In both Cessnas and the Colt Kits, the servos may have to be mounted on their sides to achieve desired clearance.
2. Cut necessary bulkheads per individual installation diagrams and add floor rails and supplemental supports as called for in diagrams.
3. Cut plywood or balsa cabin floor (not included) to form a snug fit that may be removed for easy servo access. Paint cabin area to desired color.
4. Cut scrap cloth or vinyl (not included) and upholster the floor and door areas, using spray contact cement to hold material. A two-tone contrast between the painted areas and upholstered areas is common.
5. Glue instrument panel and hood in place.
6. Glue seats and arm rests in place.
